

79522

PULL HANDLES

Material

ABS resin, black, similar to RAL 9005, with fine structure on the visible surfaces.

Technical Notes

Flush inset handle for lifting and pulling. Unilateral, tool-less single-hole installation through self-locking, recessed handle.

Stress resistance: min. 400N when installed in 1,2mm sheet steel. Max. values depend on the strength of the mounting wall.

Tips

Assembly: place the trough inset handle in the cutout, so that the upper edge of the

cutout lies in the gap being the face of the handle. Then press the bottom edge of the handle into the cutout until it clearly locks into place.

Order No.	Panel thickness s mm
79522.W0100	1,0-1,4
79522.W0140	1,4-1,8
79522.W0180	1,8-2,1
79522.W0210	2,1-2,5
